

WEBVTT

1

00:00:30.350 --> 00:00:31.750

Hector Rogel Jr.: How's it going? Carson?

2

00:00:32.640 --> 00:00:34.149

Karson Woods: Tired. How about yourself?

3

00:00:35.100 --> 00:00:37.119

Hector Rogel Jr.: Doing well, a bit tired.

4

00:00:37.280 --> 00:00:38.150

Karson Woods: Yeah.

5

00:00:38.480 --> 00:00:41.489

Karson Woods: I've been working on this, on and off since 2 Am.

6

00:00:41.970 --> 00:00:42.545

Hector Rogel Jr.: Yeah.

7

00:00:50.000 --> 00:00:51.750

Karson Woods: interesting stuff, though.

8

00:00:52.780 --> 00:00:53.630

Hector Rogel Jr.: Yeah.

9

00:02:23.850 --> 00:02:24.850

Richard Hoehn: Hey, guys.

10

00:02:25.450 --> 00:02:26.070

Karson Woods: What's up?

11

00:02:26.790 --> 00:02:27.560

Richard Hoehn: Hey?

12

00:02:36.707 --> 00:02:43.410

Richard Hoehn: it doesn't look too bad. The paper I was looking at it just a second ago on.

13

00:02:45.180 --> 00:02:50.030

Karson Woods: Yeah, I still need to add my portion, so they'll help with the length a little bit more.

14

00:02:52.080 --> 00:02:56.219

Richard Hoehn: But which portions are you talking about? I mean, this is a pretty good paper kind of thing.

15

00:02:56.570 --> 00:03:00.302

Karson Woods: Oh, I've I've only written like a quarter of a paragraph so far.

16

00:03:01.160 --> 00:03:03.268

Richard Hoehn: Well, yeah. But I mean, yeah,

17

00:03:03.620 --> 00:03:09.230

Karson Woods: I won't add to every section, because I feel like they'll really push over the page limit. So I'll just like, see which ones are the most.

18

00:03:10.120 --> 00:03:11.669

Karson Woods: And add to those.

19

00:03:12.340 --> 00:03:13.000

Richard Hoehn: Yeah.

20

00:03:16.920 --> 00:03:22.160

Hector Rogel Jr.: My greatest concern is like, does every single paragraph connect like, does it flow?

21

00:03:22.530 --> 00:03:26.879

Hector Rogel Jr.: Cause I feel like we're we're just writing stuff that we know that we did.

22

00:03:27.040 --> 00:03:30.680

Richard Hoehn: Yeah, I mean, this is the problem. With this, I think

23

00:03:30.920 --> 00:03:32.489

Richard Hoehn: thing, I guess kind of thing.

24

00:03:32.490 --> 00:03:33.120

Hector Rogel Jr.: Yeah.

25

00:03:33.120 --> 00:03:42.819

Karson Woods: Yeah, it's like trying to squish in like what 16 different privacy policies like compares bit bit much.

26

00:03:56.310 --> 00:04:04.729

Richard Hoehn: How how much time more time do you need? Do you think, car? So I I think it's pretty good like, I know you want to put a lot of your stuff in, but like

27

00:04:05.120 --> 00:04:07.330

Richard Hoehn: it's not, I'd rather.

28

00:04:08.910 --> 00:04:11.620

Karson Woods: Might be done by 10.

29

00:04:12.690 --> 00:04:13.560

Richard Hoehn: Okay.

30

00:04:13.560 --> 00:04:16.400

Karson Woods: Cause I haven't finished. I think I'll just like.

31

00:04:16.820 --> 00:04:22.889

Karson Woods: Are you gonna submit like a Pdf of the Excel spreadsheet? Or I guess X. Not.

32

00:04:23.320 --> 00:04:24.120

Richard Hoehn: Wow!

33

00:04:24.600 --> 00:04:26.289

Karson Woods: Okay. So it's gonna be online.

34

00:04:26.590 --> 00:04:33.330

Richard Hoehn: I don't think I'm gonna submit online other than this paper. Everything else is gonna be in the

35

00:04:35.110 --> 00:04:40.020

Richard Hoehn: in the Github Repository unless you guys think differently.

36

00:04:40.750 --> 00:04:45.466

Karson Woods: No cause. I haven't finished like the Ccpa ones yet for my

37

00:04:46.060 --> 00:04:50.140

Karson Woods: summary matrix. And I was gonna do that last. And so I can just do that on

38

00:04:50.290 --> 00:04:54.230

Karson Woods: online. It doesn't have to be submitted unless we are going to submit. It.

39

00:04:54.420 --> 00:04:57.279

Richard Hoehn: No, I mean, that's in the the.

40

00:04:57.840 --> 00:04:58.960

Hector Rogel Jr.: Google sheets.

41

00:04:59.240 --> 00:05:01.609

Richard Hoehn: Google sheets right? Like.

42

00:05:02.560 --> 00:05:13.359

Richard Hoehn: you know, it's not even talking about how much is being submitted. I thought I would just do the usual. The paper kind of thing. And then what did I do in the

43

00:05:14.780 --> 00:05:21.160

Richard Hoehn: pass? I think I did. Our should be jewel.

44

00:05:21.540 --> 00:05:26.730

Richard Hoehn: I would submit. You know, a bunch of our Pdfs and all that, just to be on the safe side.

45

00:05:26.730 --> 00:05:32.660

Karson Woods: Okay, yeah, I'll add my Pds for the privacy policy. Github, then.

46

00:05:33.910 --> 00:05:37.860

Richard Hoehn: No, I mean Pdfs like in, you know, weekday discussion week.

47

00:05:37.860 --> 00:05:38.699

Karson Woods: Oh, okay.

48

00:05:38.700 --> 00:05:45.199

Richard Hoehn: Those Pdfs. Now your Pdfs. That you would also want to put into the to the repository.

49

00:05:45.360 --> 00:05:47.679

Hector Rogel Jr.: Yeah, that's what I was talking about.

50

00:05:47.680 --> 00:05:48.840

Hector Rogel Jr.: The policies.

51

00:05:50.350 --> 00:05:55.570

Richard Hoehn: Yeah, agreements. Yeah, you put it in. I saw that Hector kind of thing.

52

00:05:58.850 --> 00:06:04.829

Richard Hoehn: So if you can, you add some of yours. I think you'd be okay.

53

00:06:07.750 --> 00:06:11.719

Karson Woods: Yeah, I'll probably just have like, if I'll just focus on the

54

00:06:12.420 --> 00:06:20.099

Karson Woods: paper, for now, since that needs to be submitted as a Pdf. And I should be done with like the next hour, because I'm not gonna add too much.

55

00:06:21.090 --> 00:06:22.630

Richard Hoehn: Yeah, no.

56

00:06:27.830 --> 00:06:28.800

Richard Hoehn: okay.

57

00:06:32.120 --> 00:06:35.659

Richard Hoehn: And then I'll do. Okay. So do you think you know

58

00:06:36.060 --> 00:06:38.470

Richard Hoehn: with it at 10 o'clock? Maybe, like

59

00:06:38.660 --> 00:06:41.579

Richard Hoehn: you can be done that way, I can submit it.

60

00:06:42.210 --> 00:06:42.750

Karson Woods: Yeah.

61

00:06:43.245 --> 00:06:43.740

Richard Hoehn: Okay.

62

00:06:49.550 --> 00:06:50.230

Richard Hoehn: Alright.

63

00:07:00.940 --> 00:07:03.010

Karson Woods: I guess Isaiah has done with his stuff.

64

00:07:03.590 --> 00:07:06.270

Richard Hoehn: Yeah, he put he put some stuff in, I mean.

65

00:07:07.440 --> 00:07:08.300

Karson Woods: Okay.

66

00:07:14.210 --> 00:07:15.010

Richard Hoehn: Okay.

67

00:07:33.120 --> 00:07:34.790

Karson Woods: I guess is that everything.

68

00:07:36.080 --> 00:07:53.379

Richard Hoehn: I think I'm I'm I'm good guys. I mean, I'll poke around on the paper a little bit if you want to put your stuff in and let me know Carson. Then I'll wrap it up and submit, like we usually do kind of thing, and then you can go ahead and you still update, you know, to get up kind of thing with.

69

00:07:53.380 --> 00:07:53.950

Karson Woods: Yeah.

70

00:07:53.950 --> 00:07:54.980

Richard Hoehn: You need to.

71

00:07:55.470 --> 00:07:56.230

Karson Woods: Okay.

72

00:07:56.230 --> 00:08:00.740

Richard Hoehn: That's a good good way of going about it.

73

00:08:01.000 --> 00:08:01.480

Karson Woods: Okay.

74

00:08:01.480 --> 00:08:06.010

Richard Hoehn: Does want. I think the Pdf. Or you know this paper submitted.

75

00:08:06.400 --> 00:08:07.160

Karson Woods: Yeah.

76

00:08:07.160 --> 00:08:15.199

Richard Hoehn: Because of that. What is it called like where it just checks it.

77

00:08:18.180 --> 00:08:20.460

Karson Woods: Turn it in.com, or whatever it is.

78

00:08:27.070 --> 00:08:27.980

Richard Hoehn: Okay.

79

00:08:37.030 --> 00:08:41.390

Hector Rogel Jr.: Good question. And in Google sheets, can you see.

80

00:08:41.770 --> 00:08:47.470

Hector Rogel Jr.: like who was last person that did something in the document.

81

00:08:48.470 --> 00:08:51.459

Karson Woods: Yeah, if you click like that little clock.

82

00:08:51.600 --> 00:08:55.660

Karson Woods: we'll show you like all the past edits like who edited just now.

83

00:08:56.620 --> 00:08:57.260

Richard Hoehn: Nice.

84

00:08:57.260 --> 00:08:57.810

Hector Rogel Jr.: Okay.

85

00:08:57.810 --> 00:08:59.140

Richard Hoehn: Something move or.

86

00:08:59.480 --> 00:09:04.069

Hector Rogel Jr.: No, no, I'm just asking like if if someone

87

00:09:05.520 --> 00:09:13.610

Hector Rogel Jr.: needs to do like more more work and just add it on like later on, like like after the due date. But I guess he's able to see that.

88

00:09:14.490 --> 00:09:15.180

Karson Woods: I don't think.

89

00:09:15.180 --> 00:09:18.140

Richard Hoehn: Really clicks on that. But yeah.

90

00:09:18.140 --> 00:09:24.030

Karson Woods: Yeah, I think you just like glances through it to make sure, like everyone contributed. And stuff like that.

91

00:09:24.130 --> 00:09:26.910

Karson Woods: I don't think he's gonna like do a deep dive.

92

00:09:29.150 --> 00:09:30.689

Karson Woods: If he did, I'd be surprised.

93

00:09:32.120 --> 00:09:32.920

Hector Rogel Jr.: Yep.

94

00:09:42.170 --> 00:09:44.630

Karson Woods: Did we need to have the selection rationale.

95

00:09:46.810 --> 00:09:51.730

Hector Rogel Jr.: I think, like it. It wasn't any guidelines for your step.

96

00:09:52.060 --> 00:09:53.459

Hector Rogel Jr.: 3. I think it was.

97

00:09:54.700 --> 00:09:58.339

Karson Woods: Okay, then I'll have to get that done, too. But I can get that done after the paper.

98

00:09:59.180 --> 00:10:04.189

Hector Rogel Jr.: I mean, it's just like a like 2, 3 make a sense at most.

99

00:10:04.390 --> 00:10:05.350

Karson Woods: Okay.

100

00:10:07.540 --> 00:10:09.249

Hector Rogel Jr.: For free ones, that he shows.

101

00:10:09.590 --> 00:10:13.730

Karson Woods: Okay, I see sometimes this feels so extra.

102

00:10:15.120 --> 00:10:16.190

Hector Rogel Jr.: Yes.

103

00:10:17.610 --> 00:10:21.150

Karson Woods: But just just one more module, one more.

104

00:10:45.150 --> 00:10:53.179

Richard Hoehn: Well, I'll be. I'll poking around on it, but if if you can kind of you know, try and get it done in the next 50 min or so.

105

00:10:53.320 --> 00:10:53.710

Karson Woods: Yeah.

106

00:10:54.100 --> 00:10:57.999

Richard Hoehn: Option. I think that'll be good.

107

00:10:58.260 --> 00:11:03.030

Karson Woods: Yeah, I'll let you know once I'm finished with, it shouldn't take me too much longer, because, like I said, I'm not gonna.

108

00:11:03.820 --> 00:11:07.279

Karson Woods: Do too much, because I mean, like you said there's already.

109

00:11:07.280 --> 00:11:11.730

Richard Hoehn: Yeah, yeah, yeah. Don't. Don't kill yourself. I think it's you know it.

110

00:11:13.760 --> 00:11:18.679

Richard Hoehn: You know, it's a group paper, right? That doesn't mean you have to, you know, you know.

111

00:11:18.880 --> 00:11:36.100

Richard Hoehn: Do a bunch of stuff, too, you know more, even if you kind of even proofread it and fix, you know, make it more coherent is already great to kind of thing, so don't feel like pressure to, you know. Write about yours it that's my opinion. Kind of thing. So.

112

00:11:36.100 --> 00:11:38.130

Karson Woods: Yeah, the problem is, Dr. Walg.

113

00:11:38.360 --> 00:11:41.490

Karson Woods: but I don't think you would agree with I didn't contribute too much.

114

00:11:42.330 --> 00:11:44.970

Richard Hoehn: Well, he's not happy with me either. Yeah.

115

00:11:44.970 --> 00:11:51.920

Karson Woods: Yeah, cause he got on to me for the first, st I think Module 2. I think he got on me for not really doing anything it was like, Okay.

116

00:11:55.080 --> 00:11:56.910

Karson Woods: even though I did do stuff. But.

117

00:11:57.550 --> 00:11:57.950

Richard Hoehn: Yeah.

118

00:12:02.800 --> 00:12:05.590

Karson Woods: Alright. Well, I guess that's everything.

119

00:12:06.450 --> 00:12:07.740

Richard Hoehn: Okay, guys.

120

00:12:07.930 --> 00:12:08.969

Richard Hoehn: Well, I'll

121

00:12:09.660 --> 00:12:14.499

Richard Hoehn: I'll wait for your flag, or you know you, Carson, and then we'll

122

00:12:14.850 --> 00:12:18.010

Richard Hoehn: I'll get packaged up and send out kind of thing.

123

00:12:18.010 --> 00:12:22.340

Karson Woods: Yeah. Sounds good. I'll let you know in the week 2 discussions. Once I'm finished.

124

00:12:23.460 --> 00:12:24.730

Richard Hoehn: Okay. Cool.

125

00:12:25.260 --> 00:12:26.000

Karson Woods: All right.

126

00:12:26.310 --> 00:12:28.720

Richard Hoehn: Okay, thanks guys.

127

00:12:28.720 --> 00:12:29.230

Karson Woods: Yep.

128

00:12:29.230 --> 00:12:29.670

Hector Rogel Jr.: Alright!

129

00:12:29.670 --> 00:12:30.430

Richard Hoehn: You guys later.

130

00:12:31.000 --> 00:12:31.652

Karson Woods: Yep, see ya.
