WEBVTT

1
00:00:08.920 --> 00:00:10.170
Hector Rogel Jr.: Is it going? Carson?

2
00:00:11.250 --> 00:00:12.699
Karson Woods: What's a bacterium?

3
00:00:13.220 --> 00:00:14.509
Hector Rogel Jr.: Doing good? How about yourself?

4
00:00:14.800 --> 00:00:15.690
Karson Woods: Pretty good.

5
00:00:18.310 --> 00:00:21.400
Karson Woods: I guess we're just waiting on others, Richard.

6
00:00:22.690 --> 00:00:23.500
Richard Hoehn: Hey, guys.

7
00:00:24.370 --> 00:00:25.170
Karson Woods: Also.

8
00:00:25.870 --> 00:00:27.530
Richard Hoehn: Much? Are you guys doing.

9
00:00:28.060 --> 00:00:28.860
Karson Woods: Pretty good.

10
00:00:28.970 --> 00:00:30.350
Karson Woods: How about yourself?

11
00:00:30.350 --> 00:00:33.570
Richard Hoehn: Good! Good you in the library, too. Carson.

12
00:00:33.570 --> 00:00:33.810
Karson Woods: Yup!

13
00:00:36.060 --> 00:00:36.700
Richard Hoehn: Yeah.

14
00:00:37.116 --> 00:00:37.949
Karson Woods: Since 6.

15
00:00:38.440 --> 00:00:40.426
Richard Hoehn: Oh, I do, too. I got that

16
00:00:42.025 --> 00:00:45.000
Richard Hoehn: topics in data, science or so.

17
00:00:45.420 --> 00:00:48.430
Karson Woods: That class was dropped when I took it last semester.

18
00:00:49.770 --> 00:00:53.790
Richard Hoehn: I don't think I understand half of the mathematical
stuff, but.

19
00:00:53.790 --> 00:00:55.750
Karson Woods: I didn't understand anything I know, so.

20
00:00:55.750 --> 00:00:56.815
Richard Hoehn: Okay. Okay. Good.

21
00:00:57.170 --> 00:00:58.720
Karson Woods: I don't know what I'm doing.

22
00:00:59.020 --> 00:00:59.779
Richard Hoehn: It'd be awesome.

23
00:01:01.690 --> 00:01:10.320
Richard Hoehn: Yeah, yeah, I'm really, really looking forward to the
end of the semester guys, I'm kind of just.

24
00:01:10.320 --> 00:01:11.528
Karson Woods: Just a few more weeks.

25
00:01:11.900 --> 00:01:15.970
Richard Hoehn: I'm surprised. It's almost over, actually, yeah.

26
00:01:17.490 --> 00:01:20.956
Richard Hoehn: yeah, yeah, this needs to be over soon.

27
00:01:21.780 --> 00:01:29.810
Karson Woods: Honestly, I wish you today the test already, because, like I'm worried like last 2 were rough for me.

28
00:01:31.540 --> 00:01:32.190
Hector Rogel Jr.: Engineer.

29
00:01:32.400 --> 00:01:40.370
Richard Hoehn: Yeah, okay. So you you guys haven't got anything either. That makes me feel good. Kind of thing. I'm like, you know, what's going on.

30
00:01:40.940 --> 00:01:43.610
Karson Woods: Yeah, I'm just worried. Because, like

31
00:01:44.240 --> 00:01:48.809
Karson Woods: I'd I'd like to know how I did. So I know how good I need to do on the last 2 tests.

32
00:01:50.390 --> 00:01:51.180
Richard Hoehn: Actually.

33
00:01:52.330 --> 00:01:52.900
Karson Woods: Good.

34
00:01:55.010 --> 00:02:01.310
Richard Hoehn: I mean, I did the cool even 1, 100, pretty much on them, 1, 0, 2 and

35
00:02:02.110 --> 00:02:05.819
Richard Hoehn: 1, 0, 5, I think, or something like that. So

36

00:02:06.770 --> 00:02:12.360
Richard Hoehn: yes, right around, I think that's right around the 90
or so, or slightly below it.

37
00:02:12.360 --> 00:02:13.429
Karson Woods: Something like that.

38
00:02:24.830 --> 00:02:27.206
Richard Hoehn: let me see. So

39
00:02:50.353 --> 00:02:51.259
Richard Hoehn: need to.

40
00:03:04.110 --> 00:03:07.660
Richard Hoehn: I mean, did you guys see this?

41
00:03:08.470 --> 00:03:12.380
Richard Hoehn: We kind of started year.

42
00:03:22.690 --> 00:03:23.430
Karson Woods: Please.

43
00:03:25.427 --> 00:03:33.010
Richard Hoehn: And then we have our Google Doc, which there's nothing.
And then.

44
00:03:33.510 --> 00:03:34.649
Karson Woods: Oh, okay.

45
00:03:36.810 --> 00:03:43.685
Richard Hoehn: And then we kind of started, oh, okay, you've you guys
have put a bunch in cool. Gosh, I need to catch up. In that case.

46
00:03:44.180 --> 00:03:52.464
Richard Hoehn: how did you guys find someone? Oh, you guys just found
the privacy, and you don't necessarily know if you clicked on it, it's
just the link to it.

47
00:03:53.330 --> 00:03:53.850

Karson Woods: Yeah.

48
00:03:53.850 --> 00:03:54.180
Hector Rogel Jr.: Yeah.

49
00:03:54.180 --> 00:03:54.950
Richard Hoehn: Okay.

50
00:03:55.820 --> 00:03:56.650
Karson Woods: Pardon me.

51
00:03:59.690 --> 00:04:01.079
Karson Woods: she didn't know herself.

52
00:04:02.220 --> 00:04:06.589
Karson Woods: Oh, do you guys know if it need to be like what he had
on Emma like

53
00:04:07.690 --> 00:04:10.840
Karson Woods: rubric, or can it just be like anything?

54
00:04:12.360 --> 00:04:13.680
Richard Hoehn: I think it can be.

55
00:04:13.880 --> 00:04:16.660
Richard Hoehn: I think it can be anything I mean. You know you kind of

56
00:04:17.200 --> 00:04:22.430
Richard Hoehn: kind of wanted us to read it. I guess I need to kind of
figure that out and see.

57
00:04:23.040 --> 00:04:23.932
Richard Hoehn: Reach. We wait.

58
00:04:30.220 --> 00:04:30.819
Richard Hoehn: If not.

59
00:04:30.820 --> 00:04:37.430

Hector Rogel Jr.: But it says, any project steps that in step 2 there has to be at least 3 different categories.

60
00:04:39.502 --> 00:04:45.479
Richard Hoehn: Also type might be more. Should we call that the category? Is that what what he's calling it?

61
00:04:45.700 --> 00:04:46.380
Richard Hoehn: Nothing.

62
00:04:46.380 --> 00:04:46.949
Hector Rogel Jr.: Believe so.

63
00:04:46.950 --> 00:04:47.960
Karson Woods: I think so. Yeah.

64
00:04:48.310 --> 00:04:53.480
Hector Rogel Jr.: It says, financial social media platforms, email entertainment, education.

65
00:04:54.410 --> 00:04:57.109
Hector Rogel Jr.: So it must have actually agreed to the privacy policy

66
00:04:57.520 --> 00:05:00.140
Hector Rogel Jr.: document when and how they agreed.

67
00:05:01.418 --> 00:05:07.759
Karson Woods: How does he expect us to remember when you agree to these things? Because some of these are like years ago, that.

68
00:05:08.312 --> 00:05:09.970
Richard Hoehn: Yeah, me, too.

69
00:05:12.540 --> 00:05:17.408
Richard Hoehn: So should I put in, I mean, we can this is what what's kind of cool, I could kind of in

70
00:05:18.150 --> 00:05:25.219

Richard Hoehn: date of agreement, I mean, and if we don't know, we just don't know kind of thing, you know.

71
00:05:26.120 --> 00:05:26.900
Karson Woods: Thanks.

72
00:05:27.257 --> 00:05:31.899
Richard Hoehn: I guess this will be beginning of semester. When was that? That was?

73
00:05:32.190 --> 00:05:33.420
Richard Hoehn: I guess.

74
00:05:33.850 --> 00:05:37.930
Richard Hoehn: January 2025. Probably. Did I agree to that one

75
00:05:41.360 --> 00:05:42.880
Richard Hoehn: but Google Pool.

76
00:05:43.180 --> 00:05:44.470
Richard Hoehn: No idea.

77
00:05:45.790 --> 00:05:46.700
Karson Woods: You know, like

78
00:05:47.230 --> 00:05:55.799
Karson Woods: me, like I guess, like Pearson Pearson would be like. I have no idea, because I've used them before those at least like a few years ago that I've used them

79
00:05:56.320 --> 00:05:56.959
Karson Woods: so for me.

80
00:05:57.920 --> 00:06:00.700
Richard Hoehn: That's that's that's class, I guess right.

81
00:06:01.130 --> 00:06:06.530
Karson Woods: Yeah. And then I have to use it for my, because I'm taking that business intelligence. Last, I need to take that

82
00:06:06.640 --> 00:06:08.830
Karson Woods: Pavlo desktop specialist.

83
00:06:09.160 --> 00:06:13.599
Karson Woods: So certification examples like the last week of April.

84
00:06:18.520 --> 00:06:26.419
Karson Woods: I guess. I guess. I remember when I took the tableau
one, though, agreed to that 20 January.

85
00:06:29.190 --> 00:06:29.875
Richard Hoehn: Okay.

86
00:06:37.900 --> 00:06:41.540
Richard Hoehn: yes, you guys, you guys have a good start here for
sure.

87
00:06:47.040 --> 00:06:50.230
Richard Hoehn: So let's see if I can guarantee.

88
00:06:55.180 --> 00:07:00.220
Richard Hoehn: Is that where you kind of read about it. Factor the the
requirements here.

89
00:07:00.460 --> 00:07:02.429
Hector Rogel Jr.: Oh, yeah, it's in the document.

90
00:07:02.780 --> 00:07:04.630
Hector Rogel Jr.: It's under the group project privacy.

91
00:07:05.057 --> 00:07:06.340
Karson Woods: Why aren't you.

92
00:07:08.990 --> 00:07:14.859
Hector Rogel Jr.: It says that each student creates a list of digital
services. They use minimum 8 to 10 services per student.

93

00:07:14.860 --> 00:07:17.419
Karson Woods: No front desk.

94
00:07:19.580 --> 00:07:21.410
Richard Hoehn: Where do you see this? Am I on the right track.

95
00:07:21.410 --> 00:07:22.330
Hector Rogel Jr.: Go down. Yeah.

96
00:07:22.930 --> 00:07:24.469
Hector Rogel Jr.: Step. 2. Yeah.

97
00:07:32.110 --> 00:07:33.000
Richard Hoehn: Okay.

98
00:07:33.140 --> 00:07:38.819
Richard Hoehn: So we do that. So we're we're coming. We're doing good
there. I need to add mine.

99
00:07:53.710 --> 00:08:00.709
Richard Hoehn: Also, maybe we should add maybe company size. Then we
can say big, small.

100
00:08:01.330 --> 00:08:03.619
Karson Woods: Yeah, like me, yeah, that works.

101
00:08:03.620 --> 00:08:11.120
Richard Hoehn: You know. Just so, Proctor, you, I would say, is, maybe
I don't know. Let's say small medium.

102
00:08:12.180 --> 00:08:16.900
Richard Hoehn: you know. And then, of course, Google is large thing

103
00:08:26.180 --> 00:08:28.380
Richard Hoehn: geographic regions.

104
00:08:32.030 --> 00:08:33.350
Richard Hoehn: I'll add that to you

105
00:08:38.580 --> 00:08:39.260
Richard Hoehn: shit

106
00:08:55.100 --> 00:08:57.420
Richard Hoehn: service types. We got that right.

107
00:09:13.770 --> 00:09:15.139
Richard Hoehn: I think this is

108
00:09:55.110 --> 00:09:56.349
Richard Hoehn: because he was.

109
00:10:05.920 --> 00:10:08.600
Hector Rogel Jr.: Hey, Carson, do you know what's going on in staff?
50, 70.

110
00:10:09.620 --> 00:10:11.130
Karson Woods: I dropped that class.

111
00:10:11.130 --> 00:10:12.190
Hector Rogel Jr.: He dropped it.

112
00:10:12.400 --> 00:10:16.010
Karson Woods: Yeah, I knew like it was not gonna go. Well, if I kept
up with it.

113
00:10:16.010 --> 00:10:19.909
Hector Rogel Jr.: I'm I'm still in it. I have no idea what he's
talking about.

114
00:10:20.390 --> 00:10:24.619
Karson Woods: I'm not surprised like I was so lost in the middle of
like.

115
00:10:24.830 --> 00:10:29.129
Karson Woods: if I keep going like, I said, like, if I keep going. I'm
probably gonna fail.

116

00:10:30.940 --> 00:10:34.400
Hector Rogel Jr.: Like as long as you do your work. It's like he's not a tough grader.

117
00:10:35.440 --> 00:10:36.540
Karson Woods: I guess, but it's like.

118
00:10:36.540 --> 00:10:38.080
Hector Rogel Jr.: Still have an A in that class.

119
00:10:38.310 --> 00:10:39.639
Karson Woods: Oh, nice! That's good!

120
00:10:40.300 --> 00:10:40.890
Karson Woods: Yes.

121
00:10:40.890 --> 00:10:42.529
Hector Rogel Jr.: Annoyed. He was talking about.

122
00:10:42.850 --> 00:10:43.850
Karson Woods: Oh, shit.

123
00:10:44.720 --> 00:10:47.340
Karson Woods: Yeah, it's like, Oh, no, I'm just

124
00:10:47.710 --> 00:10:53.579
Karson Woods: didn't feel like a right choice like, keep going with that class for me, because there's other ones I can take this fall.

125
00:10:55.730 --> 00:10:58.900
Karson Woods: But oh, it's just I was so lost.

126
00:11:00.940 --> 00:11:04.879
Richard Hoehn: What? What's that? What's what's that number? Is it? 7,400 or.

127
00:11:05.420 --> 00:11:05.900
Karson Woods: That is.

128
00:11:05.900 --> 00:11:06.740
Hector Rogel Jr.: 70.

129
00:11:08.078 --> 00:11:10.270
Hector Rogel Jr.: What's it called again?

130
00:11:11.940 --> 00:11:13.749
Karson Woods: Large scale data sets. I think.

131
00:11:15.550 --> 00:11:18.000
Hector Rogel Jr.: Analysis to large-scale data sets.

132
00:11:18.290 --> 00:11:18.980
Richard Hoehn: Okay.

133
00:11:18.980 --> 00:11:26.439
Karson Woods: Which I feel like that didn't even do that at all. So I
was like, Oh, well, like do stuff similar to what you've done other
classes, and it's like, you know.

134
00:11:27.000 --> 00:11:29.160
Karson Woods: it's it was not that bad.

135
00:11:29.160 --> 00:11:32.630
Hector Rogel Jr.: It's all the statistical learning, that's all that
is.

136
00:11:33.750 --> 00:11:35.970
Hector Rogel Jr.: So. It's it's it's math, heavy.

137
00:11:36.600 --> 00:11:38.719
Karson Woods: Yep, there's my baby.

138
00:12:01.320 --> 00:12:01.820
Richard Hoehn: Okay.

139
00:12:03.150 --> 00:12:11.713
Richard Hoehn: So we need to probably get through number 2 and get

into number 3. Step 3 here in the next few days, I guess.

140
00:12:19.730 --> 00:12:21.739
Hector Rogel Jr.: what's step? 5.

141
00:12:26.230 --> 00:12:30.917
Richard Hoehn: I mean, hey, this is a crazy amount of work. I mean, we're not lawyers, right?

142
00:12:31.370 --> 00:12:37.179
Richard Hoehn: I mean, this is Chat Gbt, just using Chat Gbt to compare.

143
00:12:37.890 --> 00:12:38.670
Karson Woods: Yes.

144
00:12:40.390 --> 00:12:47.813
Richard Hoehn: I mean, I've never read it. But I I doubt that this Cal California Consumer Privacy act is, you know, just a page or 2.

145
00:12:48.510 --> 00:12:49.180
Richard Hoehn: Oh.

146
00:12:52.480 --> 00:12:56.480
Karson Woods: Very easy, no problem.

147
00:12:56.880 --> 00:12:57.440
Richard Hoehn: Thanks.

148
00:13:01.760 --> 00:13:11.809
Karson Woods: It's not that long. I take that back. They have a lot of like tabs and drop down menus.

149
00:13:11.960 --> 00:13:12.640
Richard Hoehn: And

150
00:13:57.410 --> 00:13:59.120
Richard Hoehn: yeah, I guess we just need to.

151
00:13:59.400 --> 00:14:03.049
Richard Hoehn: because I need to just get get started on some of this mine.

152
00:14:04.220 --> 00:14:09.920
Richard Hoehn: So what do you guys think he means pool, all identified services.

153
00:14:10.210 --> 00:14:12.619
Karson Woods: Think it's what we're doing already with this Google, Doc.

154
00:14:12.620 --> 00:14:18.460
Richard Hoehn: The way we did. Yeah. And then we select 3 to 4 services per person for analysis.

155
00:14:19.950 --> 00:14:20.900
Richard Hoehn: So.

156
00:14:22.740 --> 00:14:23.840
Karson Woods: Think I want to be.

157
00:14:35.780 --> 00:14:36.860
Richard Hoehn: Okay.

158
00:14:41.950 --> 00:14:48.279
Richard Hoehn: so that we can then kind of select one, should we? Just

159
00:14:49.380 --> 00:14:51.500
Richard Hoehn: we can all kind of select

160
00:14:58.020 --> 00:14:59.700
Karson Woods: 3 would be good, each.

161
00:14:59.700 --> 00:15:00.110
Richard Hoehn: Yeah.

162
00:15:00.110 --> 00:15:00.850

Karson Woods: 3.

163
00:15:01.380 --> 00:15:04.489
Karson Woods: As far I feel like we get pretty lengthy.

164
00:15:04.730 --> 00:15:05.540
Karson Woods: This is right.

165
00:15:05.540 --> 00:15:06.010
Richard Hoehn: Yeah.

166
00:15:06.010 --> 00:15:07.330
Karson Woods: A lot. I feel.

167
00:15:07.330 --> 00:15:11.430
Richard Hoehn: Yeah, 3, 3 each would then be.

168
00:15:11.670 --> 00:15:14.599
Richard Hoehn: you know, 12. So I think that's plenty right?

169
00:15:15.370 --> 00:15:15.710
Karson Woods: Thank you.

170
00:15:15.710 --> 00:15:16.540
Richard Hoehn: Or paper.

171
00:15:17.460 --> 00:15:23.789
Richard Hoehn: Oh, and we'll just let each other select their 3. I guess that would make sense to me.

172
00:15:24.640 --> 00:15:25.200
Karson Woods: Okay.

173
00:15:25.200 --> 00:15:25.710
Richard Hoehn: Okay.

174
00:15:30.605 --> 00:15:36.280
Richard Hoehn: and I guess we'll just be smart about handling

diversity right? Kind of thing

175
00:15:36.460 --> 00:15:41.600
Richard Hoehn: on it. I think we can figure that out, too, since we're already approvals.

176
00:15:43.220 --> 00:15:47.140
Richard Hoehn: and then we all do step 4 individually.

177
00:15:47.730 --> 00:15:49.130
Karson Woods: Yeah, I think so.

178
00:15:49.130 --> 00:15:57.069
Richard Hoehn: And then step 6. We do the analysis. And I guess we can kind of regroup in a few days or so. I think.

179
00:16:00.410 --> 00:16:10.479
Richard Hoehn: okay, so should we. We'll just kind of try and work through step 4, 5, I guess.

180
00:16:11.340 --> 00:16:11.970
Karson Woods: Hmm.

181
00:16:12.310 --> 00:16:16.280
Richard Hoehn: Maybe one.

182
00:16:18.130 --> 00:16:24.289
Richard Hoehn: I guess, should we? We can. We probably have some time to talk about it during class on Thursday, I guess.

183
00:16:24.830 --> 00:16:26.120
Karson Woods: So probably.

184
00:16:26.740 --> 00:16:32.989
Richard Hoehn: Maybe we just kind of regroup. Then all of us kind of thing. We we take some time to just chat about that.

185
00:16:36.460 --> 00:16:37.800
Richard Hoehn: Let's see where we are.

186
00:16:38.270 --> 00:16:39.400
Karson Woods: Yeah. Okay.

187
00:16:46.730 --> 00:16:50.990
Karson Woods: And then maybe meet up like Monday or Tuesday next week
to talk about this morning.

188
00:16:51.220 --> 00:16:56.030
Richard Hoehn: Yeah, yeah. I mean, the usual will be a mad dash.

189
00:16:57.960 --> 00:16:59.050
Karson Woods: Oh!

190
00:17:00.520 --> 00:17:02.060
Richard Hoehn: I will be in.

191
00:17:02.740 --> 00:17:05.680
Richard Hoehn: I'll be in Iowa next week.

192
00:17:06.220 --> 00:17:07.380
Hector Rogel Jr.: Yeah.

193
00:17:07.630 --> 00:17:16.139
Richard Hoehn: In the middle of nowhere I'll be. I'm flying into
Minneapolis and then driving 2 h down south into it's called Clear
Lake.

194
00:17:16.560 --> 00:17:22.559
Richard Hoehn: Iowa. There's there's nothing like, Check this out,
guys. This is where I'm going. I'm like, Oh, crap!

195
00:17:23.980 --> 00:17:28.550
Richard Hoehn: Clear Lake, Iowa. Here this is where Clear Lake Iowa is
here.

196
00:17:28.550 --> 00:17:29.479
Karson Woods: Oh, this time.

197
00:17:29.840 --> 00:17:36.020
Richard Hoehn: Watch this. See what I mean.

198
00:17:36.470 --> 00:17:37.940
Richard Hoehn: I'm going here.

199
00:17:38.490 --> 00:17:43.730
Richard Hoehn: Look at this like it's it's far away from anything kind
of thing.

200
00:17:44.280 --> 00:17:45.349
Karson Woods: That is tiny.

201
00:17:46.220 --> 00:17:50.159
Richard Hoehn: Like. That's where I'm going as well.

202
00:17:50.160 --> 00:17:52.079
Hector Rogel Jr.: We should just form them there.

203
00:17:52.630 --> 00:17:57.210
Richard Hoehn: Yeah, it is. It's this, I'm working with this company
here.

204
00:17:58.372 --> 00:17:59.910
Richard Hoehn: Where are they?

205
00:18:02.770 --> 00:18:03.540
Richard Hoehn: It's not set up.

206
00:18:03.540 --> 00:18:04.300
Hector Rogel Jr.: Did it.

207
00:18:04.490 --> 00:18:06.400
Hector Rogel Jr.: They have a small downtown there.

208
00:18:07.010 --> 00:18:08.950
Richard Hoehn: Yeah, yeah, fine.

209
00:18:14.690 --> 00:18:19.359
Richard Hoehn: I mean, they have stuff, right? I mean, but this is still fairly small.

210
00:18:19.880 --> 00:18:25.470
Richard Hoehn: Yeah, definitely. But they should got an aquatic center against whatever this is.

211
00:18:26.910 --> 00:18:30.780
Richard Hoehn: And then I guess this is the lake right kind of thing.

212
00:18:35.580 --> 00:18:38.069
Richard Hoehn: What are these things? Are these boats? Or.

213
00:18:38.170 --> 00:18:43.239
Richard Hoehn: Oh, okay, they all have. Yeah, so this must be a really shallow lake.

214
00:18:47.080 --> 00:18:49.880
Richard Hoehn: Yeah, I guess this is the lake.

215
00:18:55.320 --> 00:18:56.230
Richard Hoehn: Yeah.

216
00:19:04.300 --> 00:19:09.340
Richard Hoehn: yeah, I really want to get really rich. So can I have my own jet that I could have just flown here.

217
00:19:12.290 --> 00:19:13.450
Karson Woods: Be the dream.

218
00:19:13.450 --> 00:19:18.629
Richard Hoehn: Yes, you know. Take my my G. 7 there kind of thing.

219
00:19:18.840 --> 00:19:19.415
Karson Woods: In.

220
00:19:21.790 --> 00:19:28.370

Richard Hoehn: Yeah. Well, look at this. I don't know like this is, you know.

221
00:19:28.940 --> 00:19:32.349
Richard Hoehn: So I'm gonna fly to Minneapolis and then drive down.

222
00:19:33.890 --> 00:19:36.989
Karson Woods: So it's like just one straight road shot to it.

223
00:19:36.990 --> 00:19:38.870
Richard Hoehn: Yeah, yeah.

224
00:19:40.350 --> 00:19:47.150
Richard Hoehn: I have a guys. There's nothing around like, okay, at least they're on the interstate. But like, Hey, this stuff here.

225
00:19:47.730 --> 00:19:53.160
Richard Hoehn: I don't know. There's just nothing here, you know. Look, this is just farmland. Get this.

226
00:19:55.740 --> 00:19:57.860
Richard Hoehn: and it's always the same.

227
00:20:01.850 --> 00:20:03.210
Karson Woods: It's not obvious.

228
00:20:03.960 --> 00:20:04.819
Richard Hoehn: It's crazy.

229
00:20:07.330 --> 00:20:07.870
Richard Hoehn: Yeah.

230
00:20:08.710 --> 00:20:09.190
Richard Hoehn: What is it?

231
00:20:09.190 --> 00:20:10.319
Richard Hoehn: Never been there.

232

00:20:13.547 --> 00:20:15.009
Hector Rogel Jr.: At least later.

233
00:20:15.010 --> 00:20:16.409
Hector Rogel Jr.: The lake looks nice.

234
00:20:16.410 --> 00:20:19.480
Richard Hoehn: Yeah, I was just thinking you look at these

235
00:20:21.530 --> 00:20:26.629
Richard Hoehn: gets cold, I guess. Look at this, I bet freezes. That's
a frozen lake.

236
00:20:30.955 --> 00:20:31.550
Hector Rogel Jr.: Lake.

237
00:20:31.550 --> 00:20:33.080
Karson Woods: I do some ice fishing.

238
00:20:34.040 --> 00:20:34.780
Richard Hoehn: Yeah.

239
00:20:37.910 --> 00:20:41.149
Richard Hoehn: they must really like kites. It must be really windy.
There.

240
00:20:42.030 --> 00:20:45.750
Karson Woods: We both make sense with like the lake right there.

241
00:20:52.990 --> 00:20:56.120
Richard Hoehn: Yeah, look at these kites. That's some some sort of

242
00:20:56.440 --> 00:20:59.060
Richard Hoehn: thing they do. There, look at this crazy stuff.

243
00:20:59.060 --> 00:20:59.610
Karson Woods: Excuse me.

244

00:21:00.700 --> 00:21:01.270
Richard Hoehn: Hmm.

245
00:21:06.470 --> 00:21:10.150
Richard Hoehn: I mean, these are all user uploaded, I guess. Right kind of thing.

246
00:21:17.590 --> 00:21:19.741
Richard Hoehn: Well, I'll let you guys know.

247
00:21:20.290 --> 00:21:24.700
Richard Hoehn: Oh, Frank, okay.

248
00:21:24.810 --> 00:21:30.009
Richard Hoehn: well, I think I know what I need to do. I need to work on my stuff. I need to

249
00:21:30.640 --> 00:21:37.140
Richard Hoehn: select free free services kind of do my individual analysis on it.

250
00:21:38.170 --> 00:21:44.190
Richard Hoehn: You know. I don't know if I'll have all that done. By the way, by Thursday, but at least I'll try and get going on it.

251
00:21:44.880 --> 00:21:52.579
Karson Woods: Yeah, I'll try again for Thursday. So that way, like, I'm not rushing at the very end, like I usually do.

252
00:21:55.860 --> 00:21:56.614
Richard Hoehn: Alright.

253
00:21:57.480 --> 00:22:00.169
Richard Hoehn: Well, if it's okay with you guys, I'll let you guys go.

254
00:22:01.090 --> 00:22:02.030
Richard Hoehn: Good.

255
00:22:03.310 --> 00:22:04.260

Richard Hoehn: Okay,

256
00:22:07.758 --> 00:22:10.700
Richard Hoehn: I'll send the summary to.

257
00:22:10.700 --> 00:22:11.580
Karson Woods: Do you mind?

258
00:22:11.847 --> 00:22:22.020
Richard Hoehn: Isaiah, and I could always call them, or so real quick, if just to give, get him up to speed. But he might be able to read the summary as well, or or watch the video even

259
00:22:24.870 --> 00:22:25.650
Richard Hoehn: cool.

260
00:22:26.380 --> 00:22:30.900
Richard Hoehn: Oh, oops!

261
00:22:31.800 --> 00:22:37.240
Karson Woods: I replied, stop sharing. Okay.

262
00:22:38.080 --> 00:22:39.310
Karson Woods: Alright.

263
00:22:39.590 --> 00:22:43.879
Richard Hoehn: Well, thanks, guys, I'll talk later sometime. Okay.

264
00:22:44.880 --> 00:22:45.580
Hector Rogel Jr.: With me.

265
00:22:45.800 --> 00:22:47.209
Richard Hoehn: Too. Bye, guys! Bye.

266
00:22:47.210 --> 00:22:47.840
Karson Woods: See it.
